LEGEND	
<b>Active Ingredient</b>	The " <b>Active Ingredient</b> " column lists the chemical substance for which there are established U.S. MRLs. These terms should not be considered residue definitions.
<b>Trade Name</b>	The " <b>Trade Name</b> " column lists product trade names containing the active ingredient. This information is not exhaustive and does not confirm registration for use on this commodity or in all U.S. states.
<b>Class of Product</b>	The " <b>Class of product</b> " indicates the pesticide types, which has been categorized into fungicide, herbicide, insecticide (which, in the context of the QRS, broadly includes rodenticide, molluscicide, miticide, acaricide, fumigant), as well as nematocide, plant growth regulator, and synergist.
<b>Registrant</b>	The " <b>Registrant</b> " column indicates the registrant for the substance in the United States. Data owner and licensed products may be different in other markets.
<b>Monitoring Program</b>	The " <b>Monitoring Program</b> " column indicates the latest publicly available information for select markets. Some countries publish lists of substances planned for monitoring in the current or upcoming years, while others publish residue reports detailing substances tested in past programs. Markets marked with an asterisk (*) indicate that the information is based on monitoring programs from previous years.
<b>U.S. MRL</b>	The " <b>U.S. MRL</b> " column lists the established MRLs in the United States in parts per million (ppm). It does not include substances that are exempt from a tolerance. An established MRL does not mean the active ingredient is registered for use on this commodity in the United States.
<b>"Market" MRL</b>	The " <b>Market</b> " columns list the markets' established MRLs in parts per million (ppm). An established MRL does not mean the product is registered for use on this commodity in the United States.
--	<b>A dash</b> indicates a MRL (or tolerance) is not established for the commodity and active ingredient combination.
<b>{123}</b>	<b>A MRL listed in red text and enclosed in brackets</b> indicates the MRL is more restrictive than the U.S. MRL.
<b>Default</b>	<b>Default</b> indicates the MRL value displayed is a default tolerance. Some markets apply a default MRL value when a MRL has not been established for the commodity/active ingredient combination.

<b>Import Tolerance</b>	<b>Import Tolerance</b> indicates that the MRL has been set by the country or market for imported products only. Import tolerances do not apply for domestically produced products. This MRL will be noted as an Import Tolerance only if it is specifically identified as such in the MRL regulation. Not all markets indicate whether a MRL is an import tolerance.
<b>LOD</b>	LOD is the “ <b>Limit of Determination</b> ,” which Codex Alimentarius defines as "the lowest concentration of a pesticide residue or contaminant that can be identified and quantitatively measured in a special food, agricultural commodity, or animal feed with an acceptable degree of certainty by a regulatory method of analysis."
<b>LOQ</b>	LOQ is the " <b>Limit of Quantification</b> ," which is the lowest concentration of a substance that can be measured with certainty using standard tests. The LOQ may be equal to or higher than the LOD.
<b>Processed MRLs</b>	Not all markets establish processed MRLs. For enforcement purposes, markets may choose to apply a processing factor to the MRL established on the raw commodity. Processing factors are usually not publicly available.
<b>US Regional</b>	<b>US Regional</b> indicates a U.S. MRL with regional registration. Such a tolerance is supported by residue data from specific growing regions for a raw agricultural commodity (See US 40 CFR 180.1 (I)).
<b>US Section 18</b>	<b>US Section 18</b> indicates a U.S. MRL emergency exemption.
<b>Report Updated on</b>	Data updated on June 5, 2025

#### USDA DISCLAIMER

This MRL Quick Reference Sheet does not guarantee the acceptance of shipments to foreign markets and the decision whether to ship and responsibility for shipping remains that of the shipper taking all relevant information into consideration.

#### MARKET INFORMATION

The markets listed in the MRL Quick Reference Sheet represent priority destinations for pecan exports, based on export value. Specific market information and links to the original MRL sources can be found in the sections below.

MARKET	THE FOOD AND AGRICULTURAL IMPORT REGULATION AND STANDARDS (FAIRS) ANNUAL REPORTS
Canada	<a href="#">FAIRS Country Report Annual - Published on July 3, 2024</a>

#### BCI AND FOODCHAIN ID DISCLAIMER

Bryant Christie Inc. (BCI) and FoodChain ID reminds users that pesticide maximum residues levels and associated government policies change with great frequency and that this is a static report. The information provided is to the best of BCI's and FoodChain ID's knowledge at the time the report was generated using its extensive background and network. However, information contained within this report is intended to be an initial reference only and users of this information must verify information obtained from it with knowledgeable parties in the market of interest prior to the sale or shipment of any products. Users of this information acknowledge that BCI and FoodChain ID cannot and does not warrant that the MRL data or other information contained in this report will be one hundred percent (100%) accurate and free of omissions. Given that MRL information changes rapidly and unexpected developments can occur, the users of this report should consider any information provided in this document as general guidance only. The user is responsible for all business decisions made based on any MRL and related information provided.
